

In the Claims:

1. (Currently Amended) A method for the storage, organization, indexing, retrieval, and display of information comprising the steps of:

selecting one or more indicia from an indicia source, each of said indicia having indicia information;

selecting one or more holders from a holder source, each of said holders having holder information;

applying one or more of said indicia to each of said holders, to form a combined indicia and holder;

selecting a display from a display source for each of said holder selected, wherein said display comprises a pocket portion and at least one flap tab portion;

inserting said combined indicia and holder into said pocket portion of said display, displaying said displayed indicia information and displayed holder information; and

concealing a releasable reuseable adhesive portion of said flap tab;

revealing said adhesive portion by manipulating said flap tab; and

attaching said revealed adhesive portion of said display to a secondary surface

~~manipulating said at least one flap tab portions alternately to reveal said adhesive portion to attach said display to a secondary surface, or to conceal releasable, reusable adhesive portions on each of said at least one flap tab portions.~~
